

# BDC 2 ... 8 GHz

## Directional Coupler

### STANDARD MODELS

| Model  | Frequency Range<br>X) | Coupling<br>X)<br>dB | Power<br>P <sub>min</sub><br>W | Insertion Loss<br>max<br>dB | Directivity<br>min<br>dB | VSWR<br>max<br>Main Line | Main Line<br>Connector | Coupling Line<br>Connector |
|--|-----------------------|----------------------|--------------------------------|-----------------------------|--------------------------|--------------------------|------------------------|----------------------------|
|  |                       |                      |                                |                             |                          |                          |                        |                            |
| BDC 2080-20/200<br>S: Single directional coupler | 2 ... 8 GHz           | 20 ± 1               | 0 / 0 ± 0                      | 0 / 0                       | 0                        | 2 HU, 430 mm             | 0                      | SMA-f                      |

### OPTIONS

- 1) male RF input connector
- 2) alternative main line connectors

- X) custom frequency range and custom coupling attenuation upon request
- \*) WRD 650: below 6.2 GHz, VSWR and directivity deteriorate

#### Notice:

Under normal operating conditions all Directional Couplers do not need to be mounted to a heatsink. However, if the units permanently run into high mismatch conditions at full rated power, the circuits will heat up significantly. In this case, we would recommend the units be mounted to a suitable heatsink or metal surface, capable to maintain a baseplate temperature of +60°C max.
