1) male RF input connector

X) custom frequency range and custom coupling attenuation upon request

2) alternative main line connectors

\*) WRD 650: below 6.2 GHz, VSWR and directivity deteriorate

## Notice:

Under normal operating conditions all Directional Couplers do not need to be mounted to a heatsink. However, if the units permanently run into high mismatch conditions at full rated power, the circuits will heat up significantly. In this case, we would recommend the units be mounted to a suitable heatsink or metal surface, capable to maintain a baseplate temperature of +60°C max.
