## **BDC** 1.5 ... 30 MHz Directional Coupler

## STANDARD MODELS

| Model                                       | Frequency Range       | Coupling<br>X)<br>dB | <b>Power</b><br>Pmin<br>W | Insertion Loss<br>max<br>dB | <b>Directivity</b><br>min<br>dB | VSWR<br>max<br>Main Line | Main Line<br>Connector | Coupling Line<br>Connector |
|---|-----------------------|----------------------|---------------------------|-----------------------------|---------------------------------|--------------------------|------------------------|----------------------------|
| BDC 0103-40/500<br>S: Single directional of | 1.5 30 MHz<br>coupler | 40 ±1.25             | 0 / 0 ±0                  | 0/0                         | 0                               | 2 HU, 430 mm             | 0                      | SMA-f                      |

## **OPTIONS**

1) male RF input connector

 ${\sf X}{\sf J}$  custom frequency range and custom coupling attenuation upon request

2) alternative main line connectors

\*) WRD 650: below 6.2 GHz, VSWR and directivity deteriorate

## Notice:

Under normal operating conditions all Directional Couplers do not need to be mounted to a heatsink. However, if the units permanently run into high mismatch conditions at full rated power, the circuits will heat up significantly. In this case, we would recommend the units be mounted to a suitable heatsink or metal surface, capable to maintain a baseplate temperature of +60°C max.
